ABOUT PROTECTING YOUR HOME AGAINST CRIME

HSE DEPARTMENT

WHEN CRIME HITS HOME,

the results can be devastating.
They may include:

**FINANCIAL AND
PROPERTY LOSS,**
as well as vandalism of
home and possessions

EMOTIONAL TURMOIL

-- invasion of your
privacy can cause as
much trauma as the loss
of prized possessions

POSSIBLE PHYSICAL HARM

-- intruders can become
violent, especially when
they're caught in the act.

The burglary of even one home can make
an entire neighborhood feel angry or afraid.

YOU CAN PROTECT AGAINST BREAK-INS!

In most cases, a little extra care and
thought are all that's needed. Keep
in mind that:

MOST INTRUDERS SEEK EASY TARGETS

They want to get in quickly, quietly and
unseen! The harder you make it for them,
the lower your risk of a break-in.

EFFECTIVE HOME SECURITY NEED NOT BE COSTLY!

That's because common sense and
a bit of time and energy can go a
very long way!

Find out more...

HOME SECURITY STARTS AT THE DOOR

Here are a few ways to make exterior doors a real problem for would-be intruders.

USE STURDY DOORS

Solid wooden doors or doors reinforced with steel offer much more protection than hollow-core wooden doors.

USE SAFE LOCKS

Adding deadbolt locks is a great idea because they can't be "popped" the way spring-latch locks can.

INSTALL A PEEPHOLE

Always know who's on the other side of your door before you open it.

SECURE SLIDING GLASS DOORS

A broomstick or steel rod placed in the track will help a lot! You may also drill a hole through the upper part of the slider and track, and insert an eyelet bolt or pin for added security.

REMEMBER TO BE WINDOW-WISE!

Securing your windows makes clear sense.

CONSIDER WINDOW PEGS

Drill a hole through the movable part of the window frame into the part that is stationary. Insert a nail or peg.

TRY KEY LOCKS

Window key locks help keep intruders from unlocking and lifting windows.

NOTE: Make sure everyone in the house can get to the keys in case of a fire.

LOOK INTO SECURITY GLASS

Break-resistant plastic or treated glass around doors and in windows gives added security.

MORE WINDOW TIPS:

- Make sure window air conditioners are firmly secured to the window.
- Make sure standard window locks close properly and are firmly screwed to the window frame.
- Consider installing metal grilles or bars (with inside release levers) in cellar and ground-level windows.

USE OUTDOOR LIGHTING TO YOUR ADVANTAGE

You can do a lot to make your home's surroundings unattractive to burglars and vandals!

LOCATE OUTDOOR LIGHTS CAREFULLY

Areas that benefit most from outdoor lighting are those that are most vulnerable -- garage and shed doors, entryways and ground-level windows.

CONSIDER VARIOUS LIGHTING OPTIONS

For example:

- Motion sensor floodlights turn on when a person or object moves past them.
- Photoelectric lights automatically turn on at dusk and off at dawn.
- Low-voltage lighting uses very little energy to illuminate lawns, steps, walkways, shrubs, etc.

Install floodlights high enough so that an intruder can't unscrew them!

KEEP SHRUBS AND HEDGES TRIMMED

This will give intruders fewer places to hide.

PLANT THORNY BUSHES AROUND WINDOWS AND WALKWAYS

Shrubs and bushes are favorite hiding spots for burglars. Spiny or thorny plants will discourage entry!

PLACE GRAVEL BEDS BELOW WINDOWS

Gravel can be noisy and tough to sneak across without being heard.

POSITION FENCING AND TREES WITH CARE

Make sure they don't hide your windows, doors and walkways from public view, or serve as a step up to a window or balcony.

FOLLOW THESE BASIC BREAK-IN PREVENTION TIPS

Make sure you:

NEVER ALLOW STRANGERS INTO YOUR HOME

Use your peephole -- and don't open the door! Ask service people to slip identification under the door (call their home office to double-check). Have a person who claims to need help wait outside while you call for assistance.

PLAY IT SMART ON THE TELEPHONE

Don't let callers know you're home alone, or the times of day when your home is empty. Retrieve answering machine messages often. Never give out credit card numbers or other personal information (unless you've made the call to a reputable organization).

VARY YOUR ROUTINE

Changing your daily patterns (even slightly) may discourage a burglar. Remember -- burglars hate surprises!

PUT AWAY TOOLS AND MACHINERY WHEN NOT IN USE

Don't leave them lying around where they could be stolen -- or used to gain entry into your home.

STORE LADDERS INDOORS

Don't provide burglars with a handy way to climb in through balconies, second-floor windows, etc.

CONSIDER AN ALARM SYSTEM

Not everyone needs an alarm system. But, it can be an important security feature for some people!

- Check with your local law enforcement agency and fire department.
- Shop around. Make sure salespeople explain the features of the systems they sell -- which parts of the house or property are monitored, whether or not the system can detect fires, etc.
- Ask for references. Talk to other customers about systems they bought and their experience with the security company.

MAKE SURE YOUR HOME LOOKS OCCUPIED,

even when you're away. Here are some things you can do:

DON'T SPREAD THE NEWS about your travel plans, business trips, etc.

PUT SOME ELECTRICAL EQUIPMENT ON TIMERS, such as lamps, a radio, etc.

ARRANGE FOR CALL FORWARDING

-- the phone company can route your calls to a trusted friend, neighbor or relative.

ASK SOMEONE TO COLLECT YOUR MAIL and newspapers every day.

SET UP REGULAR YARD CARE

-- such as mowing the lawn and watering the garden.

Ask a trusted friend to check your home every few days.

PROTECT THE PROPERTY IN YOUR HOME

Follow these simple steps:

MAKE AN INVENTORY of your valued possessions. Include the make, model, serial number and value of each item. This can help simplify insurance claims.

MARK YOUR VALUABLES -- use an etching tool (loaned for free by some police departments) to identify:

- cameras
- computers
- stereo equipment
- TVs.

Include your name and an identification number other than your Social Security or driver's license number.

VIDEOTAPE OR PHOTOGRAPH

small valuables (jewelry, for example) that can't be etched easily. Photograph each item next to a ruler and a piece of paper with your ID number.

CHECK YOUR INSURANCE COVERAGE,

and update it if necessary. Ask about an insurance rider for specific items that your regular policy does not cover.

NEIGHBORS UNITE!

Working with others in your community is an effective way to protect homes and fight crime.

GET ORGANIZED

Call a meeting of concerned neighbors. Post flyers, make telephone calls, etc., to get the word out.

DO A NEIGHBORHOOD SECURITY SURVEY

Make sure:

- all street lights are working
- parks and playgrounds have no overgrown trees or shrubs that could be used for hiding
- you know all the ways people can get in and out of your neighborhood
- parking areas are well lighted.

EXPLORE CRIME PREVENTION THROUGH ENVIRONMENTAL DESIGN

Community members can:

- make it easier to see within and between buildings -- for example, fences between living areas and parking areas can be removed
- work with local government to turn trouble spots into public gathering areas -- for example, a shady hangout can become a community picnic spot.

OTHER STEPS YOU CAN TAKE TOGETHER

JOIN NEIGHBORHOOD WATCH GROUPS

This means neighbors working together to recognize and report crime and suspicious activity.

HELP CLEAN UP

Neighborhood neglect sends a signal that no one cares -- and that the area is an easy target for crime. Work with others in your community to clean up vacant lots, trash piles, broken glass, graffiti, etc.

WORK WITH LOCAL LAW ENFORCEMENT OFFICIALS

Local police and sheriffs are your crime prevention partners! They may be able to provide:

- information and help in completing neighborhood security surveys
- training for Neighborhood Watch programs
- community policing
- home security checks
- strategies for crime prevention through environmental design.

What should I do if an intruder is in my home?

If you notice signs of entry, don't go in! Go to a neighbor's and call law enforcement officials. If you're already inside, don't confront the intruder. Give the intruder plenty of space to flee.

What about getting a dog for security?

Dogs can scare many burglars away. However, not all dogs are willing to protect. Also, owners are liable for any attack their dog makes.

What can we do about gangs?

Support law enforcement, church and community efforts to negotiate gang truces and stop gang activities. Support youth programs and community activities, too! They give young people an alternative to gang life.

So...

YOU CAN PROTECT YOUR HOME FROM CRIME!

✓ TAKE STEPS

to secure your home, valuables and surrounding property.

✓ JOIN FORCES WITH YOUR NEIGHBORS

-- you're more effective when you work together.

✓ COOPERATE

with local law enforcement officials.

Help stop intruders -- before they get started!
